SCIENTIFIC PROGRAMME

WELCOME MESSAGE

Dear Friends and Colleagues,

It is my great pleasure and privilege to welcome you to **PCSI 2026 in Hyderabad**

The theme of this year's meeting, **"Indian Innovation – Global Collaboration: Advances in Paediatric Cardiac Interventions and Outcomes,"** reflects the remarkable journey of paediatric cardiac care in India and our vision for the future.

Over the past several decades, India has witnessed extraordinary advances in congenital heart disease – from pioneering surgery and catheter interventions to fetal cardiology, advanced imaging, electrophysiology, intensive care, mechanical circulatory support and transplantation. Much of this progress has been shaped by Indian innovation, ingenuity and our ability to develop solutions relevant to our own patients and healthcare environment.

PCSI 2026 seeks to celebrate this journey while looking ahead. We have created a programme that brings together clinical excellence, innovation, challenging cases, contemporary science and global perspectives, with particular emphasis on outcomes and the long-term well-being of our patients.

We are delighted to welcome distinguished colleagues from India and around the world and hope that their experience, together with the collective wisdom of our own community, will stimulate meaningful discussion, collaboration and new ideas.

Above all, we hope PCSI 2026 will be a meeting where learning extends beyond the podium – through interaction, debate, case discussions and the sharing of experiences across disciplines and generations.

Hyderabad warmly welcomes you. We look forward to three days of friendship, fellowship, learning and inspiration.

Let us celebrate what we have achieved, learn from one another, and together shape the next chapter of paediatric cardiac care.

With warm regards,

Dr. Nitin Krishna Rao
